

Remote Work Security Audit

Understand your vulnerable areas

FusionTek can conduct a complete audit of your network to help relieve you of any security concerns you may have amid the mandate to work remotely.

ID Dark Web Test

In a dark web test we will tell you how vulnerable certain devices on your network may be to hacking. In this test we will see how compromised some employee credentials may be.

We will provide you information about:

- Compromised user credentials
- List of the most recently breached credentials
- Source of the breaches
- And more

OF EXPOSED CREDENTIALS FOR YOUR COMPANY 293
 EXTERNAL THREAT INTELLIGENCE <small>Are you monitoring for compromised data that can be used to exploit your business?</small> <input type="checkbox"/> Yes <input type="checkbox"/> No
DATA BREACH & PRIVACY LAW COMPLIANCE <small>Do you have a compliant data breach response plan in place?</small>  <input type="checkbox"/> Yes <input type="checkbox"/> No

YOUR INFORMATION IS ALREADY EXPOSED

Network Penetration Test

Pen testing tests a computer system, network or web application to find security vulnerabilities that an attacker could exploit. We will identify possible entry points, attempt to get in, and report the findings.

We will provide you information about:

- Different vulnerable areas across your network
- Assign risk scores to different sort of breaches so you can prioritize your time
- Allow you insights to your current security configurations across the network
- And more

Find vulnerabilities, before others exploit them
